

PROFESSIONAL SUMMARY

IT Infrastructure Specialist with 5 years of experience delivering enterprise-grade technical support and cloud infrastructure management across multi-site environments. Skilled in administering hybrid Azure/on-premises environments, Microsoft 365, Cisco Meraki networking, and leading IT projects from design through delivery. Experienced escalation resource for complex infrastructure challenges with a client-focused, documentation-driven approach. AWS Solutions Architect certified with a track record of improving operational efficiency through automation and structured project execution.

CORE SKILLS

Azure (VMs, VPN Gateway, Entra ID, Blob Storage) • Hybrid On-Premises / Cloud Infrastructure • Cisco Meraki (MX/MS/MR) • Windows Server / Active Directory / DNS / DHCP / GPO • Microsoft 365 Administration • LAN/WAN / VLANs / VPNs / Firewalls • PowerShell & Power Automate • Sophos Firewalls • VMware vSphere / Hyper-V • AWS (EC2, S3, VPC) • Veeam Backup & Disaster Recovery • Centralized Syslog / Infrastructure Monitoring • IT Project Delivery & Client Onboarding • Technical Documentation & SOPs • n8n Automation • Scale Computing HC3

EXPERIENCE

Disaster Recovery / Backup Engineer

Northland Properties " Vancouver, Canada | June 2024 " Present

- Provision and manage Azure-hosted infrastructure including Virtual Machines, VPN Gateways, Blob Storage, and Entra ID integrations, delivering consistent hybrid cloud environments across 50+ locations.
- Administer Cisco Meraki full-stack deployments (MX/MS/MR) including firmware rollouts, VLAN segmentation, and Meraki Dashboard monitoring across hotel and resort properties.
- Lead network refresh IT projects end-to-end: site surveys, hardware procurement, VLAN redesign, staging, and cutover coordination with on-site teams.
- Serve as Tier 3 escalation resource for complex routing, firewall, VPN, and authentication incidents across all supported multi-site environments.
- Administer Windows Server, Active Directory, DNS, DHCP, and Group Policy to maintain consistent security and identity management standards.
- Develop comprehensive SOPs, runbooks, and disaster recovery documentation to support knowledge transfer and operational continuity.
- Automate operational workflows using PowerShell and Power Automate to reduce manual overhead and improve team efficiency.
- Manage server hardware lifecycle including procurement, staging, firmware updates, and decommissioning across distributed data closets.

Network Analyst

Northland Properties " Vancouver, Canada | June 2022 " June 2024

- Deployed and managed Cisco Meraki wireless and switching infrastructure at multiple properties, configuring SSIDs, traffic shaping, and guest network isolation via Meraki Dashboard.
- Managed Azure cloud instances including VM provisioning and VPN tunnel configuration, maintaining hosted workloads with high availability.
- Administered Active Directory, DNS, DHCP, and Group Policy across multi-site Windows Server environments.
- Led full network modernization project at Grouse Mountain Resort, replacing aging infrastructure with current-generation Meraki and Sophos equipment.

- Implemented RADIUS authentication to enhance access control and strengthen on-premises security posture.
- Automated repetitive operational tasks using PowerShell to improve efficiency and reduce manual overhead.
- Provided end-user and application support across all supported locations, including remote and on-site troubleshooting for a broad range of systems and platforms.

IT Network Administrator

KamNic Inc. • Montreal, Canada | Feb 2021 • Feb 2022

- Promoted to permanent role after a successful internship, expanding responsibilities across Windows Server, network hardware, and firewall infrastructure.
- Managed system patching, OS updates, and virtualization environments; maintained hybrid backup environments and contributed to disaster recovery readiness.

Customer Support

Rogers • Burnaby, Canada | Feb 2022 • Jun 2022

- Delivered technical support in a high-volume environment; diagnosed connectivity and device issues with a focus on customer satisfaction and clear communication.

EDUCATION

Diploma, Computer Systems | 2019 • 2021

Lester B. Pearson, Montreal, QC

Bachelor, Electronics | 2016 • 2018

Pipe Mill Science University, Iran

CERTIFICATIONS

- AWS Solutions Architect • Associate (2025)
- AWS Cloud Practitioner (2024)
- AI & n Automation (2025)
- Sophos Firewall Certified Administrator v20 (2024)
- CCNA (2020)
