

PROFESSIONAL SUMMARY

Network Infrastructure Engineer with 5 years of experience designing, deploying, and managing enterprise network and server infrastructure across 50+ multi-site environments in the hospitality industry. Deep expertise in Cisco Meraki full-stack deployments (MX/MS/MR), Sophos firewall administration, and network segmentation across LAN/WAN environments. Proven track record in leading network modernization projects, Tier 3 escalation support, VMware/Hyper-V virtualization, and Windows Server ecosystem management. Thrives in fast-paced, event-driven environments requiring after-hours responsiveness and minimal-downtime operations.

CORE SKILLS

Cisco Meraki (MX/MS/MR) • LAN/WAN/VLAN/VPN Design • Sophos Firewalls • VMware vSphere • Hyper-V • Windows Server • Active Directory / DNS / DHCP / GPO • Azure (VMs, VPN Gateway, Entra ID) • AWS (EC2, S3, VPC) • PowerShell Automation • Network Segmentation & Hardening • Firmware Lifecycle Management • Centralized Syslog • Scale Computing HC3 • Routing & Switching • Veeam VBR / DR Orchestration • Aruba Wireless

EXPERIENCE

Disaster Recovery / Backup Engineer

Northland Properties " Vancouver, Canada | June 2024 " Present

- Engineer and administer Cisco Meraki full-stack infrastructure (MX security appliances, MS switches, MR access points) across 50+ hotel and resort properties, including firmware rollouts, network segmentation, and Meraki Dashboard-based monitoring.
- Lead VLAN redesign and network segmentation projects during site refresh cycles, coordinating hardware staging, cutover scheduling, and on-site team support with minimal service disruption.
- Administer Sophos firewall infrastructure including VPN policy management, traffic filtering, and security posture hardening across distributed multi-site environments.
- Manage VMware vSphere, Hyper-V, and Scale Computing HC3 virtualization platforms hosting 200+ physical and virtual servers across on-premises and cloud environments.
- Provision and manage Azure infrastructure including Virtual Machines, VPN Gateways, Blob Storage, and Entra ID integrations for hybrid identity and access management.
- Design and maintain centralized syslog architecture aggregating logs from firewalls, switches, and servers to enhance visibility and accelerate incident response.
- Coordinate firmware upgrades and infrastructure patching across production environments using structured maintenance windows to minimize operational disruption.
- Provide Tier 3 network escalation support for complex routing, firewall, VPN, and authentication issues across all supported sites.
- Develop SOPs and network documentation to ensure operational resilience and facilitate knowledge transfer across the infrastructure team.

Network Analyst

Northland Properties " Vancouver, Canada | June 2022 " June 2024

- Led full network modernization project at Grouse Mountain Resort, replacing end-of-life L2/L3 switches, Sophos firewalls, servers, and wireless infrastructure with current-generation equipment.
- Deployed and configured Cisco Meraki wireless and switching infrastructure at multiple properties, including SSID configuration, traffic shaping, and guest network isolation via Meraki Dashboard.
- Implemented RADIUS authentication to enhance access control and strengthen on-premises security posture across multi-site Windows Server environments.

- Administered Active Directory, DNS, DHCP, and Group Policy across multi-site Windows Server environments, maintaining consistent security and configuration standards.
- Managed Azure cloud instances including VM provisioning, VPN tunnel configuration, and resource monitoring for hosted workloads.
- Automated repetitive operational tasks using PowerShell to improve team efficiency and reduce manual overhead.
- Monitored and managed LAN/WAN, VPN, and firewall activity, reducing recurring incidents and improving mean time to resolution.
- Provided Tier 3 escalation support for routing, VLAN, and connectivity issues across all supported resort and hotel properties.

IT Network Administrator

KamNic Inc. • Montreal, Canada | Feb 2021 • Feb 2022

- Supported Windows Server environments, network hardware, and firewall infrastructure for the organization.
- Managed system patching, OS updates, and virtualization environments to maintain uptime and security compliance.
- Maintained hybrid backup environments and contributed to disaster recovery readiness.

Customer Support

Rogers • Burnaby, Canada | Feb 2022 • Jun 2022

- Delivered technical support for internet, mobile, and TV services; diagnosed connectivity and device issues across iOS and Android platforms.

EDUCATION

Diploma, Computer Systems | 2019 • 2021

Lester B. Pearson, Montreal, QC

Bachelor, Electronics | 2016 • 2018

Pipe Mill Science University, Iran

CERTIFICATIONS

- CCNA (2020)
- Sophos Firewall Certified Administrator v20 (2024)
- AWS Solutions Architect • Associate (2025)
- AWS Cloud Practitioner (2024)
- AI & n8n Automation (2025)
