

PROFESSIONAL SUMMARY

Network Support Analyst and Infrastructure professional with 5 years of experience maintaining LAN/WAN environments, performing data backup and disaster recovery operations, and implementing network security procedures across multi-site enterprise environments. Proficient in network troubleshooting, Windows Server administration, firewall management, and Veeam-based backup architecture. Proven record of reducing recurring incidents, improving mean time to resolution, and supporting hybrid cloud environments. Committed to accuracy, client-focused service, and thorough technical documentation.

CORE SKILLS

LAN/WAN Administration • Backup & Disaster Recovery (Veeam VBR, Veeam ONE) • Windows Server / Active Directory / DNS / DHCP / GPO • Cisco Meraki (MX/MS/MR) • Sophos Firewalls / Security Procedures • Network Security & RADIUS Authentication • VLANs / VPNs / Routing & Switching • VMware vSphere / Hyper-V • Azure (VMs, VPN Gateway, Entra ID) • Centralized Syslog / Network Monitoring • PowerShell Automation • Patch Management & Firmware Updates • Technical Documentation & SOPs • AWS (EC2, S3, VPC) • Aruba Wireless

EXPERIENCE

Disaster Recovery / Backup Engineer

Northland Properties " Vancouver, Canada | June 2024 " Present

- Perform enterprise backup and disaster recovery operations across 50+ locations, protecting 200+ physical and virtual servers across on-premises and cloud environments.
- Administer full Veeam ecosystem (VBR, Veeam ONE, Enterprise Manager, Orchestrator) for multi-terabyte workload protection across VMware, Hyper-V, and Scale Computing platforms.
- Conduct scheduled backup validation, automated DR reporting, and regular test restores to ensure recovery time and recovery point objectives are consistently met.
- Administer Cisco Meraki network infrastructure (MX/MS/MR) across 50+ hotel and resort properties including firmware rollouts, VLAN segmentation, and Meraki Dashboard monitoring.
- Implement and maintain network security procedures including firewall policy reviews, VPN management, RADIUS authentication, and Sophos firewall hardening.
- Design and maintain centralized syslog architecture aggregating logs from firewalls, switches, and servers to improve network visibility and incident response.
- Administer Windows Server, Active Directory, DNS, DHCP, and Group Policy across multi-site environments.
- Develop SOPs and disaster recovery documentation to strengthen operational resilience and knowledge transfer.

Network Analyst

Northland Properties " Vancouver, Canada | June 2022 " June 2024

- Monitored and managed LAN/WAN, VPN, and firewall activity to maintain high-availability environments across mountain resorts and hotel properties.
- Led full network modernization project at Grouse Mountain Resort, replacing end-of-life switches, Sophos firewalls, servers, and wireless infrastructure.
- Performed data backup operations and contributed to disaster recovery readiness and infrastructure reliability across all supported sites.
- Implemented RADIUS authentication to enhance access control and strengthen on-premises security posture.
- Administered Active Directory, DNS, DHCP, and Group Policy across multi-site Windows Server environments, maintaining consistent standards.

- Troubleshoot routing, VLAN, and connectivity issues, reducing recurring incidents and improving mean time to resolution.
- Automated operational tasks using PowerShell to reduce manual overhead and improve efficiency.
- Provided technical support across all supported locations including troubleshooting of servers, network hardware, and end-user systems.

IT Network Administrator

KamNic Inc. • Montreal, Canada | Feb 2021 • Feb 2022

- Supported Windows Server environments, network hardware, and firewall infrastructure; managed system patching, OS updates, and virtualization environments.
- Maintained hybrid backup environments and contributed to disaster recovery readiness and infrastructure reliability.

Customer Support

Rogers • Burnaby, Canada | Feb 2022 • Jun 2022

- Delivered technical support in a high-volume call centre; diagnosed connectivity and device issues with strong focus on communication and client satisfaction.

EDUCATION

Diploma, Computer Systems | 2019 • 2021

Lester B. Pearson, Montreal, QC

Bachelor, Electronics | 2016 • 2018

Pipe Mill Science University, Iran

CERTIFICATIONS

- Sophos Firewall Certified Administrator v20 (2024)
- CCNA (2020)
- AWS Solutions Architect • Associate (2025)
- AWS Cloud Practitioner (2024)
- AI & n8n Automation (2025)
